Re: License #13-20352-01

To Whom It May Concern:

We request amendment to our radioactive materials license #13-20352-01 for a move of the nuclear medicine facilities to a new building. In approximately October 2008, our entire hospital will be moving to newly constructed facilities at 720 South Sixth Street, Monticello, IN, 47960.

A sketch of the new hospital and the new nuclear medicine area are attached for your review. We confirm that the radioactive material storage will be in the room designated as Hot Lab and this room will remain locked to prevent unauthorized access when authorized personnel are not present.

We confirm that a closeout survey of the current facilities will be completed prior to release for unrestricted use. A copy of the closeout survey, to confirm that no radioactive materials or contamination remain, will be maintained for inspection.

Please contact us if additional information is needed.

Thank you.

Sincerely,

Paul Cardwell, Chief Executive Officer
