RE: Amendment to Radioactive Materials License #13-05605-01

Dear Sir or Madam:

I am requesting to amend the above mentioned radioactive materials license to reflect the following change:

We are moving our nuclear medicine department, including the hot lab, to a newly constructed portion of our facility. The new portion of the facility will have the same address as our current facility and as always, our new location will be secured and locked at all times. Included with this letter you will find the blueprints of our new area. We will be enlisting the help of Stan Huber and Consultants with the move to the new area and in closing out of the old area.

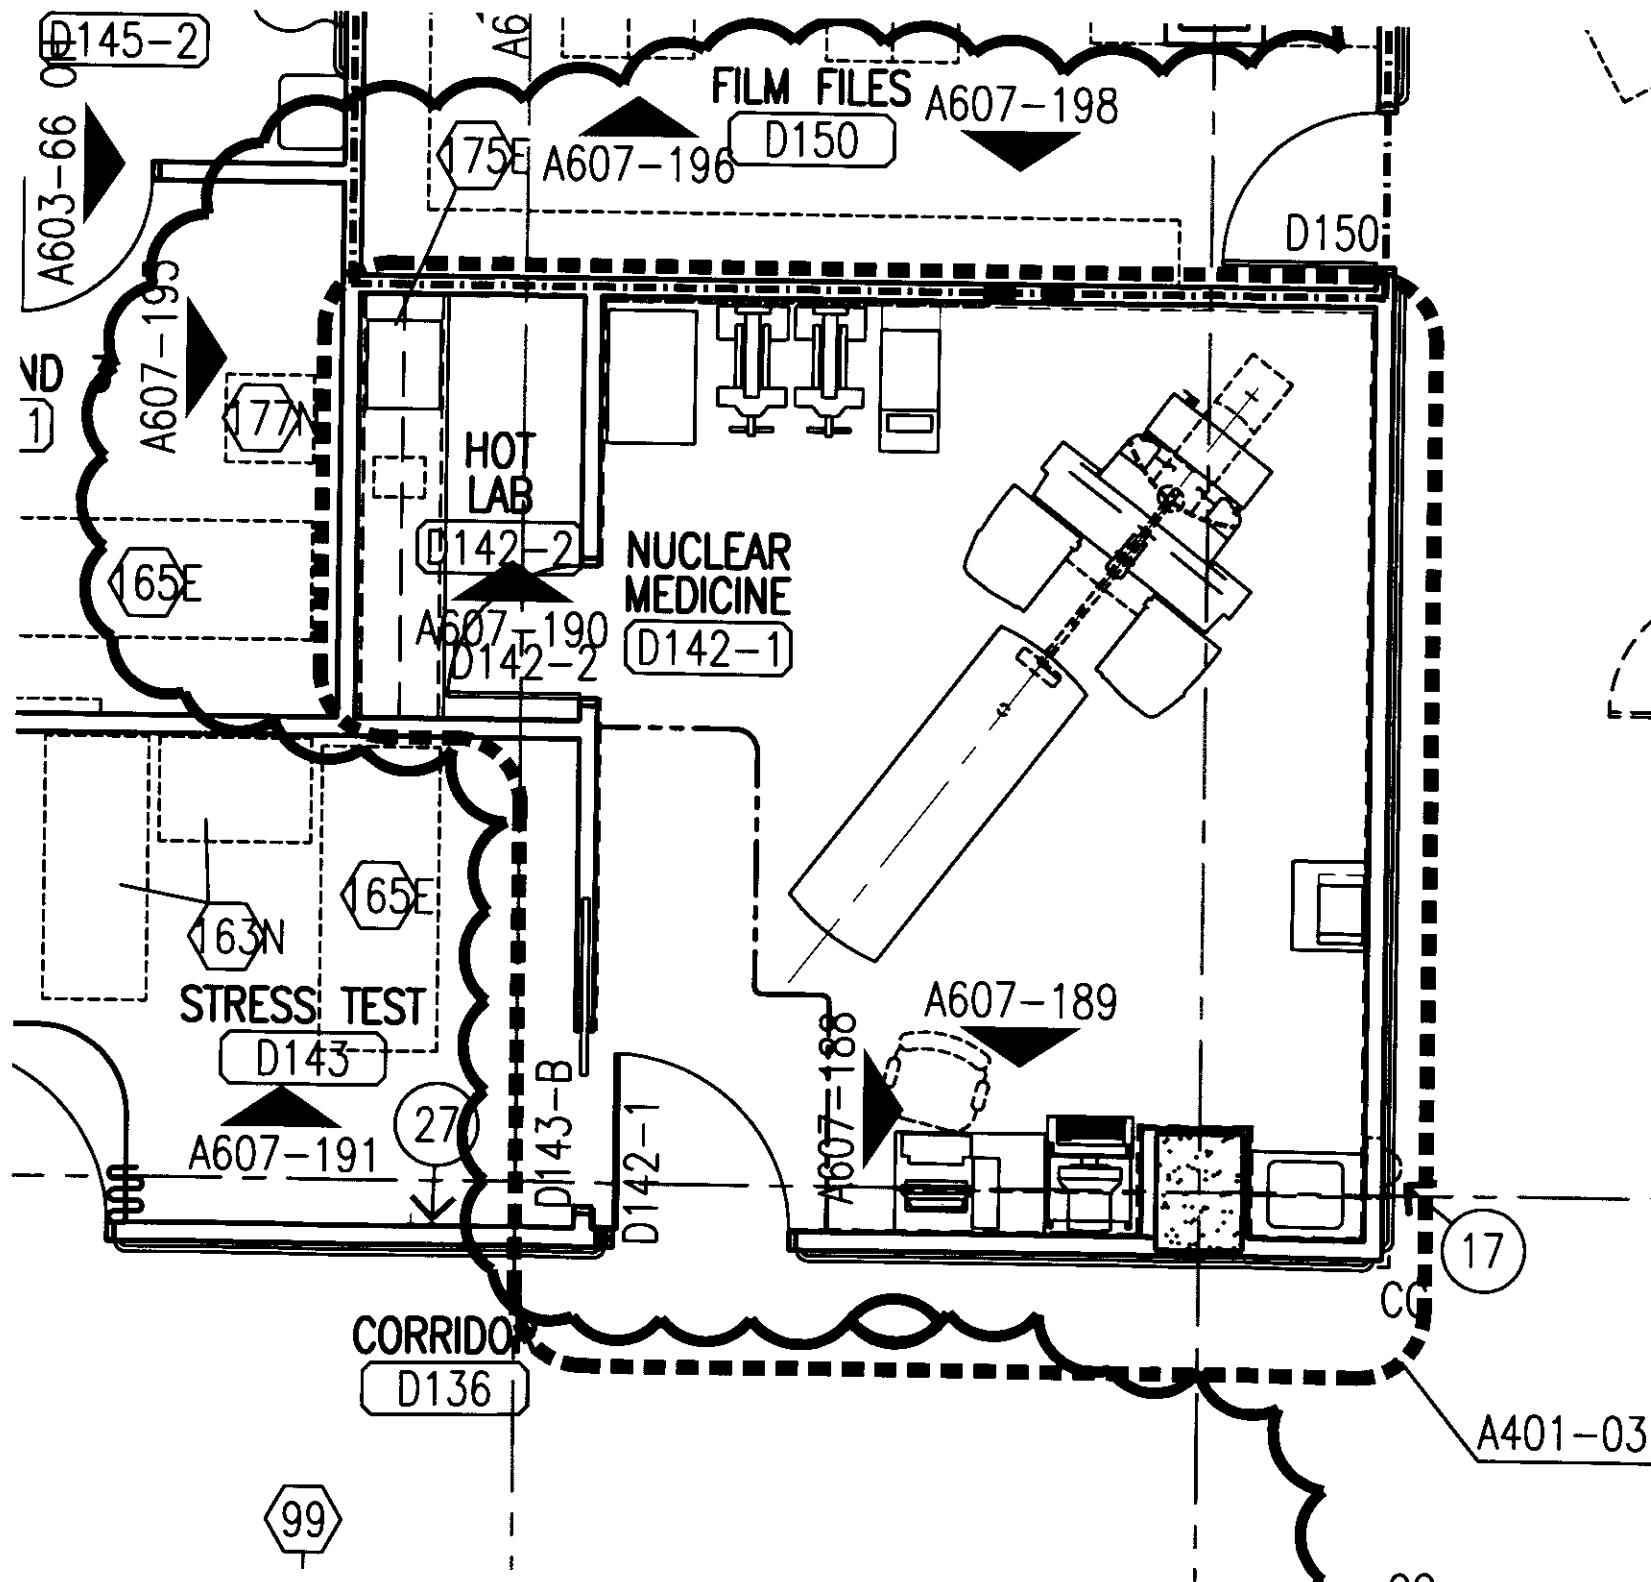

I am requesting that this request be expedited as our move is planned for July 18-25, 2008. If you have any questions regarding this matter, please feel free to call me at 812-522-0144.

Sincerely,

Lisa Cosby BS, CNMT, RSO
