Subject: Clarification of Commitment in Three Month Response to NRC Generic Letter 2008-01, "Managing Gas Accumulation in Emergency Core Cooling, Decay Heat Removal, and Containment Spray Systems"

Grand Gulf Nuclear Station
Docket No. 50-416
License No. NPF-29

Reference: GNRO-2008/00033 - Three Month Response to NRC Generic Letter 2008-01, "Managing Gas Accumulation in Emergency Core Cooling, Decay Heat Removal, and Containment Spray Systems" dated May 6, 2008

Dear Sir or Madam:

On May 6, 2008, Entergy Operations, Inc. submitted a request to extend the October 11, 2008 response due date requested in NRC Generic Letter 2008-01, "Managing Gas Accumulation in Emergency Core Cooling, Decay Heat Removal, and Containment Spray Systems." A commitment was made as follows: "any piping segments that are determined to need in-field verification and evaluation but have not prior to the nine month response will be entered into the Corrective Action Program by October 11, 2008, with due dates no later than one month after the restart from our refueling outage."

After discussion with NRC, it was determined that the commitment needed clarification. For clarification, the commitment is revised as follows: GGNS will submit the complete nine month response to Generic Letter 2008-01 one month after the completion of the next refueling outage, but no later than December 19, 2008 (should the outage be extended).

If there are any questions or if additional information is required, please contact Dennis Coulter, Senior Licensing Specialist at (601) 437-6595.

I declare under penalty of perjury that the foregoing is true and correct. Executed on June 30, 2008.

Yours truly,

Michael A. Krupa
Director, Nuclear Safety Assurance
