John,

As part of the tech staff's ongoing review of the subject alternative-based RR, it was identified that in the first sentence of page "75 of 191" of the application, NMPNS states that it will inspect 145 elements in the next interval; however, in the table on page "174 of 191," it indicates that NMPNS will inspect 120. We'd like to resolve this inconsistency over a phone call.

Please let me know when you can support a call.

Thanks,

Rich Guzman
