Post Office Box 1295
Birmingham, Alabama 35201

SUBJECT: REVISION TO THE VOGTLE EARLY SITE PERMIT AND LIMITED WORK
AUTHORIZATION REVIEW SCHEDULES

Dear Mr. Miller:

By letter dated March 28, 2008, Southern Nuclear Operating Company (SNC) submitted revision 4 to the Early Site Permit (ESP) and Limited Work Authorization (LWA) request. During the sufficiency review of revision 4, the staff identified a significant technical issue regarding SNC's development of the coefficient of friction between the soil and the mudmat interface. In order for the staff to complete its review of the LWA request, it will need to perform a review of the soil structure interaction (SSI) analysis that SNC provided in revision 4. This portion of the review is on the critical path.

This revised schedule also reflects ongoing reviews in the areas of seismology, hydrology and fitness for duty (FFD). These issues are not currently critical path items.

This letter provides revised schedules to complete the reviews described above. The NRC staff plans to issue the final safety evaluation report on February 5, 2009. To support this review schedule, the NRC staff expects the submission of timely and quality responses to its requests for additional information from SNC.

If you have any questions or comments concerning this matter, you may contact Christian Araguas, the NRC safety review project manager, at 301-415-3637.

Sincerely,

/RA/

Stephanie Coffin, Branch Chief
AP1000 Projects Branch 1
Division of New Reactor Licensing
Office of New Reactors
