Re: Amend NRC Lic No. 34-26645-02 to change location.

We would like to amend our license to relocate our facility from:

5288 Transportation Blvd
Cleveland, Ohio 44125

to:

5145 Brecksville Road, Ste 105
Richfield, Ohio 44286.

The new facility diagram is attached showing our secured storage location for RAM. Written agreement with the landlord to possess RAM is attached

It is planned to occupy the new facility in mid-July. RAM will be transported to the new address accordance with DOT regulations. All materials will qualify as Limited Quantities.

A close out survey of the existing facility will be completed and may be submitted if needed to show no removable contamination is left behind. An example of the close out record that will be used is attached. The facility may be released for unauthorized use, if permitted by the Bureau, by the RSO, Frank Bloer, following our acceptable closeout survey.

We would also like to amend to remove authorization for and possession of our TechOp source: Cs-137, 144.3 mCi, 8/20/87, Tech/Ops, Model 77302, S/N S600-288. This source has been transferred to a licensed facility at M.D. Anderson in Austin Texas. Documentation to this effect is on file.

We understand the Bureau will invoice us for this amendment action.

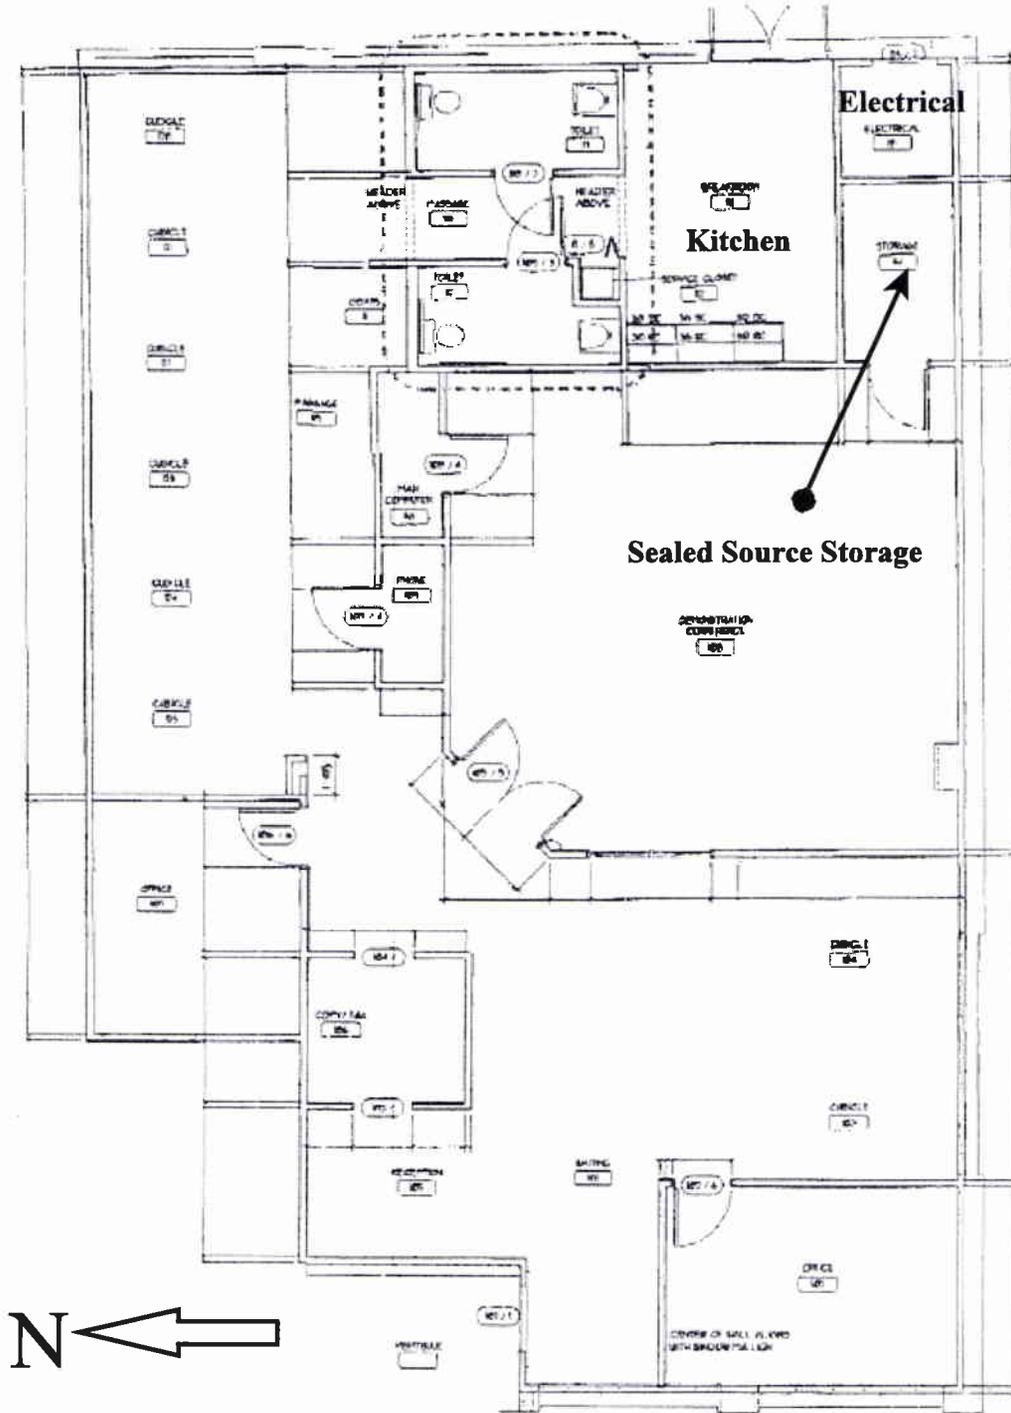

RECEIVED JUL 03 2008

If you need additional information please contact us.

Sincerely,

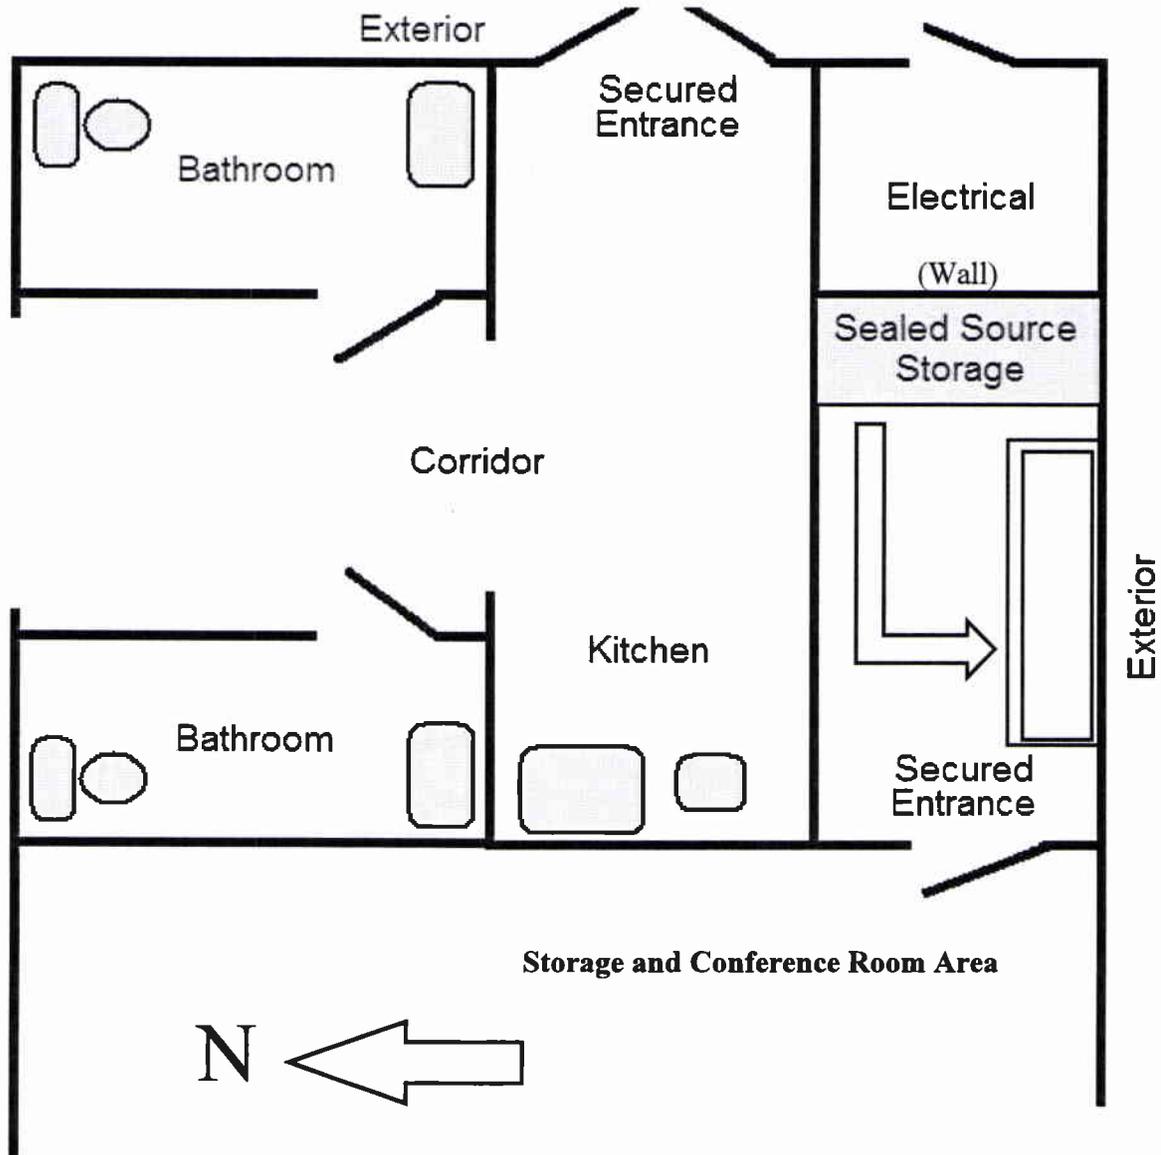

A handwritten signature in black ink, appearing to read "Frank Bloe". The signature is written in a cursive style with a large initial "F" and "B".

Frank Bloe

 Richfield, OH 44286

Scale: 1 in = 9.5 ft

E-vial Sealed sources are stored in original shipping container which is 1/4" of Pb for shielding.

Exposure level in any unrestricted area will be maintained at 2.0 mr/hr or less. Typically, background exposure levels (0.02 mr/hr) are expected.

Door is key locked.

Proposed Close-Out Survey of 5288 Transportation Blvd.
Garfield Heights, Ohio 44125

After all radioactive material was removed from 5288 Transportation Blvd a close out survey showed the following results.

All areas of byproduct material or NARM use and storage were surveyed for ambient radiation exposure and at 1cm from the surface of various areas. Wipe smears were taken in areas to check for removable contamination.

Instruments: GM survey meter - Ludlum 14C, S/N XXXX was last calibrated on XXXXX. Check source reading on date of survey was within \pm XX% of the expected value. The survey meter was set at the most sensitive scale for the close out survey.

Wipe tests - The Tennelec/Cambers Scaler with Bicron 2 inch NaI well counter was used. Efficiency for converting cpm to dpm was XX%. Minimal detectable activity (MDA) for this well counter was XX μ Ci when evaluated with an NIST traceable Co-57 rod source.

Survey results: Date

	Location	Survey (mR/hr)	Wipe test (dpm/100cm ²)

MEMORANDUM OF UNDERSTANDING

6/10/08

Date: _____

Facility: Associates in Medical Physics, LLC

I hereby permit the possession and use of all radioactive materials listed under Nuclear Regulatory Commission (NRC) radioactive materials license number 34-26645-02 and/or for State of Ohio (OH) radioactive materials license 03220180001 as authorized for Associates in Medical Physics, LLC (AMP). This agreement allows for complete and sole control of radioactive materials by AMP for use located at 5145 Brecksville Road, Ste. 105, Richfield, Ohio 44286.

Certain areas within the leased premises are identified as areas of radioactive materials use, or restricted areas. The purpose is to insure all potential exposure to authorized users on the license and any members of the public be kept ALARA (As Low As Reasonably Achievable). All surveys, decontamination and waste disposition of radioactive materials will be controlled by AMP, as required by NRC regulations or State regulations, as applicable, and as committed to in the radioactive material license applications held by AMP with each respective regulatory agency. In case of any disagreement or disharmony between the Landlord and the Tenant, Tenant will have the ability and right to gain access and retrieve all radioactive materials and record keeping to meet NRC and State regulatory requirements. Also, and in this particular scenario, a close-out survey of the storage and use areas will be completed by AMP as soon as practical, submitted to the respective regulatory body, i.e., NRC or State of Ohio, and have it approved prior to release of the space for unrestricted use.
