US Nuclear Regulatory Commission
2443 Warrenville Road
Suite 210
Lisle, IL 60532-4352

Attention: Kevin Null

Kevin – Attached is the requested Drawing and explanatory sheets as regards the permanent radiographic facility at our newly acquired facility at Waterford, CT (previously licensed as iTi under license #06-30317-01). This facility has been subsequently audited by the Commission and complies with the requirements of both the NRC orders 05-090 & 07-305.

The radiation program currently described in CONAM's license 12-16559-02 is applicable to the Waterford, CT location and will be implemented by that location. At this time, other than "best practices", there are no procedures at Waterford additional to CONAM's written practices that need to be incorporated into CONAM's licensed operating procedures.

Please let me know if the attached information is sufficient for your needs.

Thanks,

A handwritten signature in black ink, appearing to read "Robert J. Slack", with a long horizontal flourish extending to the right.
