RE: NRC License # 29 - 31131 - 01
Docket # 03037144
Control # 142321

Ms. Weidner:

This letter is in response to your letter dated June 28, 2008 requesting additional information with regards to my amendment request:

1. I will obtain a letter signed by the management of each client site I will render services that permits the use of byproduct material at the client's address and will clearly delineate the authority and responsibility between the client and myself.
- 2/3. I would like to have the ability to have my Nuclear Medicine Technologist, transport the byproduct material to the client sites. I will therefore develop, document, and implement procedures to assure radioactive materials are transported in accordance of all applicable regulations. I will address the use of approved packages, labeling, shipping papers, package surveys, bracing of packages, security provisions, and written emergency procedures in procedure form prior to me providing services to any client site.
4. I confirm that the vehicle will be secured from unauthorized access, if the vehicle contains radioactive material and is unattended.
5. I confirm that all radioactive materials, including radioactive waste, will be returned to the base location at the end of each day of use.

If you need any additional information please contact my consulting physicist, Joseph Giardina, M.S. at (718) 578-9775

Ajay Agarwala, M.D.
