Subject: CROSSFLOW Topical Report Withdrawal SE

Tim, Warren, & Jerry,

The attached file has my version of the SE that I think we should send to Westinghouse as the basis for our withdrawal of the CROSSFLOW Topical Report CENPD-397-P and its supplement for X-BEAM. I tried to write it in plain language at a basic level. The focus is on the fact that W/AMAG has not demonstrated that the device can achieve the claimed uncertainty, rather than trying to prove the device does not work. It is about 10 pages of text with a little rollover to the 11th page. Hopefully, this is a version we can all agree to without substantive changes. Thanks for your support and education on this complex technical issue.
