Subject: Follow-up information

David,

First of all, thanks for the information you have sent thus far. The information on the HRAs cleared up a lot of confusion. Looking at my original e-mail it looks like items 1 through 3 have been sent. After review of this information, we would like the following additional information:

1. All the cutsets from figure 1
2. The timeline used in the evaluation of the HRA for "OPEN-MO-25B-5/7"
3. Supporting information for the "Best Estimate of Fraction" for "SRV-STATUS.

This information is the same as asked for earlier, but a little more focused on justification for the HRA assumptions.
