As we discussed, we plan to issue the attached inspection report and related enclosures in support of the license termination request from Heritage Minerals. This action can be completed in advance of issuing the staff's Commission Paper, which is also working thru regional concurrence. For the most current version of the dose assessment and responses, please refer to the ADAMS versions identified as an enclosure on the cover letter.

I plan to return to the office on Wed. However, if you have any questions, please contact Marjorie.

Following your concurrence, we will have an exit interview with HMi and then issue this report. The next action will be to issue a letter to NJ proving the NRC staff response to their questions.
