BROWNS FERRY NUCLEAR PLANT (BFN) UNITS 1, 2 AND 3, SEQUOYAH NUCLEAR PLANT (SQN) UNITS 1 AND 2, AND WATTS BAR NUCLEAR PLANT (WBN) UNITS 1 AND 2 - NRC GENERIC LETTER (GL) 2008-01: MANAGING GAS ACCUMULATION IN EMERGENCY CORE COOLING, DECAY HEAT REMOVAL, AND CONTAINMENT SPRAY SYSTEMS, DATED JANUARY 11, 2008 - REVISED COMMITMENT

- Reference: (1) TVA's letter to NRC dated May 9, 2008, Initial Response to NRC GL 2008-01: Managing Gas Accumulation in Emergency Core Cooling, Decay Heat Removal, and Containment Spray Systems, Dated January 11, 2008
- (2) TVA's letter to NRC dated June 6, 2008, Revised Response to NRC GL 2008-01: Managing Gas Accumulation in Emergency Core Cooling, Decay Heat Removal, and Containment Spray Systems, Dated January 11, 2008

TVA provided responses to GL 2008-01 in the referenced letters.

This letter is provided to move forward TVA's schedule for completing walkdowns on BFN Unit 1 from the Cycle 8 refueling outage (RFO) to the Cycle 7 RFO.

This effectively revises in part, 3 commitments made in Reference 2 (above), Enclosure 3, "List of BFN-Specific Commitments."

The revised BFN-Specific Commitment No. 2 now reads as follows:

A134
NRC

U.S. Nuclear Regulatory Commission
Page 2
July 11, 2008

No. 2 Complete the detailed walkdowns of BFN Unit 1, 2 and 3 inaccessible piping sections of GL 2008-01 subject systems prior to startup for the listed RFO for respective units (*Unit 1, Cycle 7, Unit 2 Cycle 15 and Unit 3 Cycle 14*).

Accordingly, the completion schedule for Commitment No. 3 is also revised to agree with Commitment No. 2 and reflect the new schedule as follows:

No. 3 Complete evaluations of GL 2008-01 subject systems using results of the detailed walkdowns of inaccessible piping sections and submit supplemental responses to NRC documenting completion of the walkdowns and any impact upon the GL 2008-01 response as a result of completed evaluation within 90 days following startup from the listed RFOs (*Unit 1 Cycle 7, Unit 2 Cycle 15, Unit 3 Cycle 14*).

In addition, Commitment No. 4 is revised to be in agreement with Commitment Nos. 2 and 3 and now reads as follows:

No. 4 Adverse conditions discovered during the next RFO will be entered into the Corrective Action Program and evaluated for applicability for the other 2 operating units (*Units 2 and 3*).

BFN-Specific Commitment No. 1 remains unchanged.

TVA believes that moving the completion of BFN Unit 1 walkdowns forward to the fall of 2008 during the Cycle 7 RFO will help TVA better understand BFN gas accumulation issues by the earliest practical date.

Should you have any question concerning this letter, please contact Rob Brown at (423) 751-7228.

I declare under penalty of perjury that the foregoing is true and correct. Executed on the 11 day of July, 2008.

Sincerely,

Michael A. Purcell
Senior Licensing Manager
