

U.S. NUCLEAR REGULATORY COMMISSION

TELEPHONE CONVERSATION RECORD

Date: June 19, 2008

Time: Various

Mail Control 141903 License No(s) 37-04594-11 Docket No(s) 03015139
or Report No(s).

Name of Licensee: Drexel University

Name of Participant(s): Kent Lambert, Radiation Safety Officer
Ed Yeager, Radiation Safety Office Technician
Steven R. Courtemanche, Health Physicist NRC RI

Telephone No. 215-762-3411
610-337-5075

Subject: Need for a Corrected Copy of the license
(NOTE: This will be used as the Documents Title in ADAMS)

Summary: Michael Perkins, NRC, brought me the license and informed me that the program codes had not been changed when the license was split due to the Commonwealth becoming an Agreement State. He needed to know what was the appropriate program code so that he could inform Headquarters.

I spoke with Mr. Yeager who informed me that Mr. Lambert was on vacation but could be reached by cell phone. The devices used on the vessel were air samplers and they were custom-built by the university on the broad scope license. I explained that I would need to issue a corrected copy to the license because the licensee's activity did not involve research and development per se but the use of the device as an analytical instrument. Mr. Yeager stated that he would have Mr. Lambert call me back.

Mr. Lambert called and I explained the situation to him. He thought that the license should still be for research and development but would go with whatever the Commission decided. He would have his staff look into the manufacturer and model number of the sealed source.

Mr. Yeager called and stated that the sealed source was manufactured by Amersham and had a model number of NCB23. I looked up Amersham sources and determined that the source was Model No. NBC.

Action Required: Issue corrected copy.
