Subject: Request for Executive Branch Views
Attachments: CBP106.PDF

Good afternoon, Robin:

Enclosed for your consideration is an application, received by the U.S. Nuclear Regulatory Commission (NRC) from Halliburton Energy Services (HES), requesting a specific license (CBP106) to export to and import from India Category 2 quantities of Americium-241/Be for ultimate use by HLS Asia, Limited (a foreign collaboration with HES) in India.

Before NRC takes action on this request, and in light of India being on the restricted destinations list (10 CFR 110.29), we would appreciate Executive Branch views.

I look forward to hearing from you.

Stephen Baker
