**Subject:** Re: MOX Acceptance Review

Craig,
I had a brief conversation with Bill Troskoski, who's looked so far at the chem safety portions of the LA and some other parts. He basically reiterated what he said during yesterday's meeting, that there are things missing from the LA that were there during the CAR or should have been added at the LA stage. He wanted to see if we had any, but I haven't looked much at the LA yet.

Will you be able in the coming week to look some at your parts of the LA to get a sense of where it stands for crit? Do we have major pieces of information that is missing? Or are we better off in crit (which they've said is almost identical to what they had at the CAR stage) than in those other areas? I'll spend probably tomorrow and a good part of next week looking at Section 6.4 of the LA to gain a sense of where we stand.

Thanks,
Chris
