Craig,
What days are you normally here? I will not be able to make the MOX meeting today due to Dennis Damon's briefing on fire suppression. Do you have any major findings to discuss?

I spent the last couple days looking over my portions of Chapter 6. I think that they've at least discussed most acceptance criteria from the SRP, though there are a lot of areas where I know we'll need more information. I notice there are a lot of things that were in the CAR that have been removed--not sure how big a problem it will be yet, but I haven't seen any show stoppers yet. I wanted to get a sense from you how things look now. Next on my agenda is to start a detailed look at the ISA Summary.

If you do perchance go to the meeting, can you let me know is anything significant was said.

Thanks,
Chris
