**Subject:** MOX Briefing to the ACNW&M This Week

Hi Dave:

Thank you for the excellent briefing you gave to the ACNW&M Committee this week on planned waste management activities at DOE's MOX fuel fabrication facility. From the Committee's standpoint, the briefing was timely and useful but as agreed during the meeting, the Committee looks forward to another NMSS briefing on the same topic after you had a chance to complete your review of the license application. I will send you a copy of the meeting transcript when it comes out so that you may have a record of the waste management issues and questions that are of concern to the Committee with regard to this project.

Thanks again and happy holidays/Merry Christmas, Latif
