Subject: Fwd: Heads-Up on MOX and Waste Management

FYI - My impression of the meeting was different. We'll touch base with ACNW staff to get their thoughts.

Hi Margie,

Just a heads-up - I received feedback about the presentation today on MOX waste management from two ACNW&M members. They both were very displeased with the presentation and felt they were being stone-walled; the presentation and discussion did little to assuage their concerns about the waste management area not being adequately addressed; there was no mention/discussion about the previous waste management concerns in the ACRS letter; there was little technical substance to the presentation/discussion; and they felt too little was being done.

I was a bit taken back with their negative and spontaneous comments, but I agree with them.

They both said they would meet as a committee and see about drafting a letter on MOX waste management.

My recommendation is to be proactive on the waste issues. Over the next six months, let's sort it out and get back to them with a better explanation and analysis.

Also, I am a valuable resource for MOX but I am unused - I feel shunned! I just respond to DPO stuff! Please have me help on some of these issues. I multitask complex issues and tasks superlatively and, if conflicts arise (with GNEP, Hanford, fuel course etc.), I'll let you know in a timely manner.

Have a good one,

Alex.
