Dave,

I wanted to confirm our plans for Thursday's chemical safety meeting. Below is our planned approach for the meeting.

- General AP process overview
- Example event strategy - Red Oil (similar to Oct meeting, but probably reduced somewhat)
- PSSC --> IROFS crosswalk for Explosion Events
- FSER Chapter 8 crosswalk
- Testing status

I've gotten questions related to the meeting agenda. Based on previous discussions with you and Bill T., I've told people that the agenda includes items that will have to addressed at some point during technical review - but not necessarily at the kickoff meeting. I believe our approach for Thursday is consistent with previous discussions; however, I did what to double check to make sure. I don't think we'll run out of material with the five items listed above.

Dealis
