Subject: followp from yesterdays discussion on PT limits

Jim - Mike Mayfield wanted me to pass on to you the exact reference/citation in the regulation that was discussed at yesterday's DCWG Meeting for PT Limits. Mike believes this is worthy of further discussion with GEH.

10 CFR 50, Appendix G, IV.2.d. Pressure tests and leak tests of the reactor vessel that are required by Section XI of the ASME Code must be completed before the core is critical.

Please forward to Mark L. (I don't think I have his e-mail) and arrange to followup with the staff on the intent of the figure that was on the cover page of the slides. If it was a misunderstanding on our part of what the figure was trying to convey an e-mail response back should suffice with confirmation of GEH's intent. If there is any confusion, a telecon should eb scheduled through Chandu.

Tom will be communicating the information to the DCWG via Gina. Any followup discussions with the staff on this topic should be coordinated between GEH and the COL applicants.

Thanks,
Amy
