Subject: Acceptance review results for Quad Cities Nuclear Power Station Unit 1, dated June 19, 2008

John/Michelle

By letter dated June 19, 2008, Exelon Generation Company, LLC, submitted a relief request for Quad Cities Nuclear Power Station (QCNPS) Unit 1. The request stated that the proposed relief request would extend the 5-year inservice test (IST) interval for the 0203-3C Main Steam Electromatic Relief Valve (ERV) at QCNPS Unit 1 on a one-time basis to 5-years plus approximately six weeks (i.e., to the start of the first refueling outage after expiration of the 5-year interval) . The purpose of this letter is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this amendment request. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review.

The NRC staff has reviewed your request and concluded that it does provide technical information in sufficient detail to enable the staff to proceed with its detailed technical review and make an independent assessment regarding whether the relief request should be granted. If additional information is needed for the staff to complete its technical review, you will be advised by separate correspondence.

If you have any questions, please contact me at (301) 415-6606.

Joel S. Wiebe
