Detroit, MI 48219

License No. 21-13255-01
Docket No. 030-02149

Dear Mr. Bennett:

This refers to the routine safety inspection conducted by Mark Mitchell of this office on October 13, 1992, of activities authorized by NRC Byproduct Material License No. 21-13255-01, and to the discussion of our findings with Dr. Harold Daitch at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities were found to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

In addition to the above areas, the inspector examined actions described in your letter dated October 2, 1989, regarding violations found during our August 25, 1989 inspection. The violation in the enclosed Notice is a repeat item. In your response to this violation, please describe why your proposed corrective action is expected to be more successful in preventing future or similar violations than the corrective action specified in your October 2, 1989 letter. Corrective actions for the other violation appeared adequate and we have no further question regarding this matter.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosure, and your response to this letter will be placed in the NRC Public Document Room.

The response directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
