Hi Jim,
I am attaching the calibration and MDA calculation for the well counter that was used to count the wipes. As I mentioned in an earlier email I am working on obtaining the calibration certificate for the portable survey meter, which I will get a copy of on Wednesday when I visit the site. I will then send you a pdf of that document Thursday. Please don't hesitate to contact me if you have additional questions or need more information.

As for not getting a voice mail on the number listed below I don't have an explanation as this is my business cell phone so it should always go to voice mail and certainly recognizes a missed call if something goes awry. The first incoming call I received from you was also associated with your voice message. Strange. Regardless, please contact me if you have questions. Thank you – Lisa

Subject: Cassia Regional Medical Center

Ms Bosworth: I am working on an NRC license amendment request from Cassia Regional Medical Center concerning a decommissioning survey of the old nuclear medicine room. For the wipe test counting instrument and the Ludlum survey meter used for the decommissioning surveys, please describe the last calibration date and calibration method and also the calculations used to establish the minimum detectable activity (MDA) for the instruments.

You can fax or e-mail this information to me. My fax number is 925-673-0112. If you have questions concerning this request please contact me at 925-673-9646.

Jim Montgomery, USNRC, Region IV
