

## TELEPHONE CONVERSATION RECORD

Date: July 21, 2008

Name of person called or who called you:  Incoming  
Roberto Torres  Outgoing  
Organization: NRC Region IV, NMSB-B

Phone No.: 817-860-8189

Subject: Discussion of Part 35.690 training and experience requirements pertaining to Dr. Halligan at Providence Alaska Medical Center

Summary: Discussed Dr. Halligan's ABR Radiation Oncology certification situation and the preceptor statement submitted with license amendment request (471797). Although Dr. Halligan's ABR certificate does not contain the words "AU Eligible" as called for on the NRC website toolkit, his preceptor certified that Halligan completed the requirements in 35.690(a)(1) which is the 3 years of residency training. Along with his other documented training, including vendor training on the HDR unit, it appears Dr. Halligan would meet the alternate pathway qualification if no credit were given to his ABR certification. The continuing education requirement has also been met.

Mr. Torres agreed and concurred on my decision to proceed with licensing Dr. Halligan for 35.600 HDR procedures.
