Dear Sir,

This letter is to request that the pending amendment to add our facility, as a location of use, on the American Diagnostic Medicine NRC license be expedited due to the urgent need to have nuclear medicine services available at our new hospital location. This is a new hospital that opened its doors for patient care last week and is the only critical access hospital within approximately 50 miles.

Your assistance with this request would be greatly appreciated. If you have any questions regarding this request please feel free to call me.

Sincerely,

Robert Myers, COO
