Rich,

The Region's licensing staff have given this their highest priority. We have divided this task among several experts in order to compress our review time. However, because we received the actual documents so late yesterday (5:00 p.m.), we will not be able to meet our original schedule. We are currently reviewing the document and are planning to meet this afternoon to discuss and compile our comments. Without knowing the scope of our comments, I expect that we should be able to have a conference call tomorrow. We may be able to call you later today with a reasonable estimate for this call.

Viv

Dear all –

Are we going to be able to have our teleconference this afternoon? Please advise.

Thanks.

Best regards,

Rich
