Subject: Excursion CM9-3

Steve / Dave

On May 30, 2008 monitor well CM9-3 was sampled during routine monitoring. The well exceeded the multiple excursion parameters for chloride and alkalinity. This well was re-sampled on May 31, 2008 and exceeded the multiple excursion parameters for chloride, alkalinity, and conductivity. This e-mail is to inform you that Crow Butte has placed monitor well CM9-3 on excursion.

If you have any questions please feel free to call me at 308-665-2215 ext 114 or on my cell phone at 308-430-5359.

Thank you,
Larry Teahon
