Mr. K. P. Singh
President and CEO
Holtec International
555 Lincoln Drive West
Marlton, NJ 08053

SUBJECT: SPENT FUEL STORAGE CASK SECURITY ASSESSMENTS

Dear Mr. Singh:

In accordance with the Atomic Energy Act of 1954(AEA), as amended and 10 CFR Part 72, Holtec International (Holtec or the vendor) holds certificates of compliance for two spent fuel storage casks. You may recall that our staff contacted your office and the other Part 72 certificate holders to arrange closed meetings to discuss the U.S. Nuclear Regulatory Commission's (NRC's) engineering evaluation and security assessments of representative spent fuel storage cask designs. Although arrangements were being made to assure the proper control of information to be discussed, the meetings were canceled due to generic concerns regarding the proper handling of Safeguards Information (SGI). Since that time, the Energy Policy Act of 2005 has imposed new fingerprinting and FBI identification and criminal history records check requirements for access to SGI.

As discussed in Enclosure 1, "Spent Fuel Storage Security Assessment Findings," the NRC did not identify a need for any additional mitigative measures based on the results of the security assessments for an array of storage casks. However, the NRC staff would still like to provide Holtec the opportunity to discuss the security assessments in a closed meeting.

The NRC staff is offering the following three options for your consideration:

1. No further interaction.
2. NRC holds a closed meeting with all four major cask vendors. NRC will not present SGI; the information presented will be Official Use Only—Security-Related Information (OUO-SRI).
3. NRC holds a closed meeting with all four major cask vendors. NRC will present SGI, subject to the conditions described below.

If a meeting with the four major cask vendors is held, the agenda would include the following:

1. The Security Assessment (SA) framework process
2. Discussion of threat scenarios evaluated
   a. For the OUO-SRI meeting option, this will be a general discussion
   b. For the SGI meeting option, this will be a more detailed discussion and this is the only portion of the meeting that will include SGI
3. Discussion of SA framework findings
4. Insights for future designs/modifications

If Holtec is interested in meeting with the NRC to discuss SGI, personnel attending the meeting must be fingerprinted for an FBI identification and criminal history records checks, and also have a "need to know" to be authorized to receive the information. SGI is a special category of sensitive unclassified information that is protected similar to Government classified confidential information and significantly more than other sensitive unclassified information (e.g., privacy and proprietary information). Any person who produces, receives, or acquires SGI is subject to the requirements (and sanctions) of the AEA. Inadequate protection of SGI, including inadvertent release or unauthorized disclosure, may result in civil and/or criminal penalties. Therefore, if Holtec chooses to meet with the NRC staff to discuss SGI, the NRC staff will issue an Immediately Effective Order to Holtec imposing appropriate SGI protection requirements. As will be set forth in the Order, authorization to receive SGI in written or verbal form involves the following:

1. The NRC would have to determine if the individuals receiving SGI have a need to know.
2. Individuals receiving SGI must submit fingerprints to the NRC to initiate a criminal history records check, or demonstrate that they have been fingerprinted elsewhere for a Federal government security clearance (or demonstrate that they are subject to any other exception in 10 CFR 73.59).
3. Individuals who receive SGI are prohibited from disclosing SGI to any unauthorized person.

We would appreciate a response within 30 days of the date of this letter. In your response, please indicate whether Holtec has an interest in meeting with the NRC to discuss the results of the security assessments. If Holtec is interested in meeting on this topic, please indicate whether Holtec is interested in meeting to discuss the information at either an OUO-SRI level or SGI level.

If you have any questions, please contact Shana Helton at (301) 492-3284 or Elizabeth Thompson at (301) 492-3334 or by e-mail to shana.helton@nrc.gov or Elizabeth.thompson@nrc.gov.

Sincerely,
/RA/ N.Mamish for
