Subject: Calvert Cliffs Unit 3 COL Figure 2.1-1 -Site Area Map

John,

I decided that I can complete my review with what is provided.

The site boundary on figure 2.1.6 and EAB found in Figure 2.1-1 and 2.1.4 are satisfactory, however, the plant's north/south orientation is different in 2.1-5. A very minor item

The Site Area Map is required to be to scale to permit the reviewer to check the distances specified in the SAR and to determine the distance-direction relationships to exclusion area boundaries, and to roads, railroads, and waterways that cross or come close to the EAB, The map should show the location and orientation of plant structures and effluent release points with respect to exclusion area, property, and site boundaries.
