July 22, 1981

Mr. James P. O'Reilly, Director
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission
Region II - Suite 3100
101 Marietta Street
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - VALVE ACCELERATIONS FOR PIPING ANALYSIS - WBN CEB 8008 - FIFTH INTERIM REPORT

The subject deficiency was initially reported to NRC-OIE Inspector M. Thomas on October 2, 1980, in accordance with 10 CFR 50.55(e). Interim reports were submitted on November 3, 1980, and January 13, February 20, and April 2, 1981. We expect to provide additional information by September 8, 1981.

TVA is continuing to evaluate all safety Class 1 (ANS N-18.2) valve installations. The results of that evaluation will dictate the level of evaluation that will be performed for Class 2 and lower classes.

If you have any questions, please get in touch with D. L. Lambert at FTN 357-2581.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills
L. M. Mills, Manager

Nuclear Regulation and Safety
