JAN 24 1979

Mr. William H. Regan, Jr.  
Chief  
Environmental Projects Branch 2  
Division of Site Safety and  
Environmental Analysis  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Regan:

We have reviewed the final environmental statement for the Watts Bar Nuclear Plant, Units 1 and 2, Rhea County, Tennessee, received on January 2, 1979 from the U.S. Nuclear Regulatory Commission. Due to the nature of this study and its concern with operational impacts, the Council has no comments to offer at this time.

We appreciate your investigation of the possible effects of this proposal upon cultural resources.

Sincerely,

Jordan E. Taanenbaum  
Chief, Eastern Office  
of Review and Compliance
