

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, DC 20555 - 0001

July 11, 2008

MEMORANDUM TO: File

FROM: Stephen J. Cohen **/RA/**

SUBJECT: NEW FACILITY LICENSE APPLICATION, ENERGY METALS CORPORATION'S JAB AND ANTELOPE SITES, WYOMING

On July 10, 2008, U.S. Nuclear Regulatory Commission (NRC) staff received Energy Metals Corporation's (EMC's) application for a new facility license at its JAB and Antelope sites in Sweetwater County, Wyoming. The July 10, 2008 submittal included the technical report but not the environmental report. As a result, I contacted Ken Milmine, EMC, by telephone and informed him that we would not begin to process the application until the staff receives the environmental report. Mr. Milmine acknowledged the staff's position and stated that the environmental report would be submitted to NRC staff by the end of July 2008.
