RADIATION PROTECTION SECTION

January 13, 1976

G. D. Milligan
Kerr-McGee Nuclear Corporation
Kerr-McGee Center
Oklahoma City, OK 73125

Dear Mr. Milligan:

This acknowledges receipt of your application dated December 30, 1975 for renewal of your Ambrosia Lake Mill license.

Since your license renewal application is deemed timely, former U. S. Atomic Energy Commission Source Material License SUA-616 is hereby extended during the period of agency consideration of your application.

Notice is made of your proposal of November 24, 1975, to construct plastic lined evaporation ponds 9 and 10. Use of such ponds is hereby acknowledged and reference will be included in your new license. Notice is made of your proposal of December 30, 1975 to operate a barium chloride plant at your mill. Use of such is hereby acknowledged and reference will be included in your new license.

Receipt of incomplete plans for your ion-exchange plant in Section 35 and 36 is acknowledged. If complete plans arrive during consideration of your license renewal application, this plant will be considered concurrently with the renewal application.

None of the above has been found to be marked as "Proprietary".

Sincerely,

9803020139 740113
