LISLE, ILLINOIS 60532-4352

JUL 31 2008

Derek Hetes  
Radiation Safety Officer  
BASF Corporation  
1609 Biddle Avenue  
Wyandotte, MI 48192

Dear Mr. Hetes:

It has been brought to our attention that Amendment No. 50 to license No. 21-00627-02 dated July 28, 2008, contained errors in License Items 9.C., 9.D. and 9.E. all involving model numbers of source holders/gauges. License Item 9.C., as issued, did not change the Model Number from 5205 to 5205A for the Thermo Fisher Scientific /TN Technologies source holders, as was requested in your letter dated July 2, 2008 (tied down in License Condition 26.B. of the subject amendment). Also, the model numbers of the new Berthold Technologies gauges in License items 9.D. and 9.E. incorrectly listed the model numbers as **LP 300 LP** series and **LP 300 L** series, respectively, rather than the correct model numbers which are **LB 300 LP Series** and **LB 300 L Series**, respectively, (bolding added for ease of identification). Enclosed is the corrected copy of Amendment No. 50 to your NRC Material License No.21-00627-02, specifying the correct model numbers as noted above. We apologize for any inconvenience this error may have caused you. Please note that the correction made to your license has been printed in **bold** font.

Please review the enclosed document carefully. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

  
Loren J. Hueter  
Materials Licensing Branch
