Re: NRC License 03-23853-01VA

Dear Ms. Frazier,

I am forwarding the enclosed report regarding Event Number 44219. The report addresses three medical events that occurred at the VA Medical Center, Philadelphia, Pennsylvania, and is submitted pursuant to 10 CFR 35.3045(d). The medical center holds VHA Permit Number 37-00062-07 under our master material license.

A medical event involving three patients was reported to the NRC Operations Center on July 18, 2008. The event involved permanent implant prostate seed brachytherapy.

My staff performed the initial on-site part of a reactive inspection on May 28-29, 2008, and returned on June 24-25, 2008, to evaluate the circumstances of the events, assess initial actions to prevent a recurrence, and assess regulatory compliance. This inspection remains open. At the exit meeting on May 29, 2008, the inspectors asked the medical center to review a sample of additional brachytherapy treatments. This review by the medical center has revealed additional patient procedures that might be medical events. The NRC Operations Center was notified of these additional possible medical events on June 6, 12, 21, 25, and July 2, 8, 10, 15, 18, 22, and July 25, 2008, as amendments to Event Number 44219. This report addresses three of these additional possible medical events.

If you have any questions, please contact me at (501) 257-1571.

Sincerely,

A handwritten signature in black ink, appearing to read "E. Lynn McGuire".

E. Lynn McGuire
Director, National Health Physics Program

RECEIVED AUG 01 2008

Potential Medical Event - NRC Event Number 44219 Addendum

Notification of a possible medical event per 10 CFR 35.3045:

A brachytherapy procedure in which the administered dose may differ from the prescribed dose by more than 0.5 gray to an organ and the total dose delivered may differ from the prescribed dose by 20% or more.

VA Master Materials License **NRC License No. 03-23853-01VA**

Permittee: VA Medical Center, Philadelphia, PA

Date(s) of Event(s): See IMPLANT DATES below

Date Discovered: July 18, 2008

Date Reported to NHPP: July 18, 2008

Date Reported to NRC: July 18, 2008

Name of Prescribing Physician: Gary Kao, M.D., Ph.D.

* Prostate dose was prescribed for 145Gy.

** Original CT scan unreadable or data corrupted.

Description of the Event:

Three permanent prostate brachytherapy implant procedures were performed using Iodine-125 seeds on the dates listed above. The activity per seed and number of seeds prescribed in the written directives and used in the original treatment plans were ordered, received and implanted. Efforts to retrieve the CT scan for 1 of the above patients were not successful. Patients were scheduled for CT scans in July, 2008. These were re-contoured and post-treatment plans were run. The D90 doses for the above 3 patients were significantly lower (more than -20%) than the planned prostate D90 dose. The original prescribed prostate dose for 1 of the above patients was 145 Gy and not 160 Gy. Dosimetry was recalculated on 7-21-08 and results verified the D90 for both 160 and 145 Gy planned doses were more than 20% low.

As per the nomogram shared with NHPP, VACO, and Dr Giri, Chief, National VA Radiation Oncology Program, the above medical events are confirmed based on recently obtained repeat CT scans.

On July 18, 2008, the RSO and Chief of Radiation Oncology Service reviewed the results for the above patients and determined Medical Events had occurred. On 7-18-08, the RSO notified NHPP of these findings. The data for these patients is being reviewed as part of the causal analysis currently in process.

The prostate brachytherapy program was formally put on-hold in early June, 2008, and remains in stand-down. All identified necessary procedural changes will be implemented to prevent a recurrence before the program is reactivated. These changes will be verified before any brachytherapy procedures are performed.

Why the Event Occurred:

Root causes of event are still under investigation.

Effect on Patient:

Effect on patient is still under review.

Corrective Actions:

- Program is on-hold pending results of investigation
- QA program for Radiation Oncology is under review

Patient notification:

On July 18, 2008, the Chief of Radiation Oncology Service phoned the above 3 patients and their referring physicians, or primary care providers. Patients and referring physicians, and/or primary care providers, were informed the patients received a lower than planned prostate dose, that the patients cases were being reviewed externally by an expert to obtain treatment option recommendations, and that the patients were entitled to receive a written report of the event.

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.
