Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - NRC-OIE REGION II INSPECTION REPORT  
50-390/81-26, 50-391/81-24 - SUPPLEMENTAL INFORMATION ON VIOLATION  
50-390/81-26-04, 50-391/81-24-03

The subject inspection report dated December 23, 1981 cited TVA with four Severity Level V Violations in accordance with the provisions of 10 CFR 2.201. Our responses were submitted February 5, 1982. A revised response to the subject violation was submitted on April 8, 1982. In that response, TVA committed to be in full compliance by March 25, 1982. However, as discussed with Inspector D. Quick on September 2, 1982, TVA has not yet completed its assessment of the cleanliness of the HVAC system. We now anticipate this being completed by November 3, 1982.

If you have any questions, please get in touch with R. H. Shell at

To the best of my knowledge, I declare the statements contained herein are complete and true.

Very truly yours,
