Pre-Application Review Meeting with Toshiba on the 4S Reactor Design, August 8, 2008

NRC Pre-Application Review Objectives

- Provide for timely identification of regulatory requirements
- Provide for timely, independent assessment of safety and security characteristics
 - Familiarize NRC staff with the design's safety case, security approach, and technology base
 - Inform the development of NRC technical insights and infrastructure to support independent assessment
- Provide timely feedback to pre-applicant on:
 - key safety, design, and licensing issues
 - technology development program plans
