REMARKS: IMC 2513 (Light Water Reactor Inspection Program – Preoperational Testing And Operational Preparedness Phase)
IMC 2513 App A (Light Water Reactor – Preoperational Testing Phase)
IMC 2513 App B (Light Water Reactor – Operational Preparedness Phase)

IMC 2513 and its appendices are being reissued and reactivated as a part of the 10 CFR Part 50 construction inspection program to support the resumption of construction activities at Watts Bar Unit 2. The inspection of construction activities at Watts Bar Unit 2, following restart of construction in 2007, is governed by Inspection Manual Chapter 2517, “Watts Bar Unit 2 Construction Inspection Program.”

IMC 0609 (Significance Determination Process) has been revised to change the term “choice” letter to “Preliminary Determination” letter and add a third responsibility to the Office of Enforcement (OE) in Section 05.05. The section on Significance Determination Process (SDP) Timeliness is clarified to eliminate literal interpretation of timeliness goals by the licensee. The term “AV(TBD)” is replaced with “to be determined” (TBD) due to changes in IMC 0612 “Power Reactor Inspection Reports.” Repetitive guidance that appears in both this IMC and Attachment 1 is removed and appears in Attachment 1 only.

IMC 0609 Att 1 (Significance and Enforcement Review Panel Process) has been revised to delete the IMC 0612 definition of AV; replace the term "choice" letter with Preliminary Determination letter; and replace Exhibits 2, 3, and 6, and Enclosure 1 with Enforcement Manual Form 3-II, or 3-II(S) for security-related matters, as derived from SECY-06-0036, "Public Disclosure Options within the Security Cornerstone of the Reactor Oversight Process," and Enforcement Manual Form 3-III, or Form 3-III(S) for security-related matters. In addition, the Significance and Enforcement Review Panel (SERP) Worksheet was revised; and the exhibits are reordered.

DISTRIBUTION: Standard
