Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - RADIATION DOSE INSIDE CONTAINMENT
EXCEEDS CABLE QUALIFICATION - NCR WBN QES 8001 - SUPPLEMENTAL INFORMATION

The subject deficiency was initially reported to NRC-OIE Inspector M. Thomas on March 31, 1980 in accordance with 10 CFR 50.55(e). Interim reports were submitted on April 24, July 1, and September 19, 1980 and April 13, June 18, August 18, and November 3, 1981. Our final report was submitted on January 18, 1982 and our revised final report was submitted on February 17, 1982.

As discussed with NRC Inspector, R. V. Crlenjak, by telephone on March 31, the date of April 1, 1982, for completion of corrective actions indicated in our revised final report on this matter was not met. The original date for issuing the Environmental Design Criteria was inadvertently changed, thus causing the commitment date to be missed. The corrective action on this matter will be completed by August 1, 1982.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
