Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - ELECTRICAL SEPARATION FIELD AUDIT
WBRD-50-390/81-20, WBRD-50-391/81-19 - FURTHER SUPPLEMENTAL INFORMATION

The subject deficiency was initially reported to NRC-OIE Inspector R. W. Wright on February 5, 1981 in accordance with 10 CFR 50.55(e) as NCR W-31-P. Interim reports were submitted on March 9, April 21, and July 17, 1981. Our final report was submitted on November 27, 1981 and supplemental information was submitted on January 26, 1982.

As discussed with NRC Inspector, R. V. Crlenjak, by telephone on March 31, the date of February 26, 1982, for completing the revisions to the appropriate conduit and grounding drawings and reissuing WBN Quality Control Procedures 3.3, 3.4, and 3.5 was not met. Because of the current workload, TVA now expects to issue the subject procedures by April 30, 1982. The conduit and grounding drawings were revised on March 2, 1982.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
