Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - NCR CEB 79-37 - POTENTIAL TO OVERLOAD CCS PUMP DISCHARGE NOZZLES - FURTHER SUPPLEMENTAL INFORMATION

The subject deficiency was initially reported to NRC-OIE Inspector M. J. Gouge on January 3, 1980 in accordance with 10 CFR 50.55(e). On January 31, 1980 we submitted a final report, on May 20, 1980 we submitted a revised response, on July 18, 1980 our revised final report was submitted, and on February 10, 1982 we submitted supplemental information.

As discussed with NRC-OIE Inspector R. V. Crlenjak by telephone on March 18, the date of March 1, 1982 for completion of corrective actions indicated in our last report for unit 1 was not met because of overall construction delays. The corrective action on this matter for unit 1 will be completed by August 20, 1982.

If you have any questions, please get in touch with R. H. Shell at FTS 85d-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
