Attn: Mr. James P. O'Reilly, Regional Administrator  
101 Marietta Street, Suite 3100  
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - STEEL CONTAINMENT PENETRATION  
ASSEMBLY - WBRD-50-390/81-08, WBRD-50-391/81-07 - SEVENTH INTERIM REPORT

The subject deficiency was initially reported to NRC-OIE Inspector F. Cantrell on December 19, 1980 in accordance with 10 CFR 50.55(e) as NCR WBN CEB 8014. Interim reports were submitted on January 19, April 7, June 16, September 9, and December 16, 1981 and February 18, 1982. All of the deficient piping problems have been reanalyzed and issued except one. TVA is still reanalyzing the remaining piping problem. Because of this, all design drawings have not yet been revised. We expect to submit our next report by June 21, 1982.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager  
Nuclear Regulation and Safety
