**STRATEGIC TEAMING AND RESOURCE SHARING (STARS)
Comments on Proposed Generic Communication;
Fatigue Analysis of Nuclear Power Plant Components**

Reference: 1) Federal Register Notice (73 FR 24094), Proposed Generic
Communication – Fatigue Analysis of Nuclear Power Plant
Components, dated May 1, 2008

Dear Sir or Madam,

The Strategic Teaming and Resource Sharing (STARS) alliance submits the following comments in response to the Federal Register Notice of the Nuclear Regulatory Commission's proposed issuance of a regulatory issue summary (RIS) addressing a potential nonconservatism in the method used to perform fatigue analysis calculations for nuclear power plant components (73 FR 24094). STARS appreciates the Staff's effort to communicate the proposed generic communication and provide the opportunity for public comment.

STARS endorses the comments submitted by the Nuclear Energy Institute (NEI) suggesting that the proposed RIS be withdrawn. Should the proposed RIS be issued, STARS encourages the Staff to specifically identify the analysis issues leading to the issuance of the RIS and to include specific guidance and recommendations in the issued RIS.

Thank you for your consideration of these comments. If there are any questions regarding these comments, please contact me at 573-676-4775, or tmoser@ameren.com, or Don Rickard at 573-676-8802, or drickard@ameren.com.

Sincerely,

T. Moser, Chairman
STARS Integrated Regulatory Affairs Group
