**Subject:** RE: Response to Workshop on Security and Continued Use of Cesium-137 Chloride Sources

Dear Dr. Zubair-

This is an e-mail acknowledgement of receipt of correspondence from you on your interest in participating in NRC's September 29-30, 2008, *Workshop on Security and Continued Use of Cesium-137 Chloride Sources*.

We are pleased that you will be able to join us in the workshop and have included your name as one of the panel members that will be participating in the roundtable discussions on your specific area of interest regarding the Mayo Clinic position regarding the use of <sup>137</sup>CsCl blood irradiators. NRC is continuing to seek input from all stakeholders, including professionals like you, the user community, and the general public. During mid-September, an NRC staff member will be in contact with you to provide you with a draft agenda and provide you with the date that your specific roundtable issue will be discussed. Roundtable panel participants are being selected with the goal of providing balanced view points on each of the various issues outlined in the Federal Register.

Once again thank you for your interest and participation in this upcoming workshop. Your interest and comments on the Federal Register Notice and Issues Paper are important to the NRC in order to fully and adequately foster discussion amongst stakeholders about the issues and alternatives before any potential future actions by NRC or the Agreement States are initiated.

Please continue to check the NRC website at <http://www.nrc.gov/materials/miau/licensing.html> to view any additional documents relevant to this issue. If you wish to discuss your comments further, please do not hesitate to contact me at the phone or e-mail listed below.

Sincerely,

Cynthia G. Jones, Ph.D.

**Subject:** Workshop on Security and Continued Use of Cesium-137 Chloride Sources

Dear Dr. Cynthia Jones,

I am interested in attending the upcoming workshop on security and continued use of cesium-137 chloride sources. I will also be glad if I will have the opportunity at the workshop to present Mayo Clinic position and recommendations on the use of Cs-137Cl blood irradiators. I look forward to receiving the details about workshop.

Best regards,

Abba
