SUBJECT: RESPONSE TO CONFIRMATORY ACTION LETTER (CAL No. 4-08-002)

Dear Mr. Hinyup:

This letter is to acknowledge receipt of CAN USA, Inc.'s response dated June 19, 2008, to the Confirmatory Action Letter (CAL) issued on June 18, 2008. The CAL was based on findings obtained during a June 12, 2008, inspection of your company's licensed activities on a Chevron offshore platform, located at Main Pass 299BB in the Gulf of Mexico. NRC staff discussed our inspector's observations with Mr. Dwight Witter, CAN USA Inc.'s Radiation Safety Officer (RSO), during conference calls on June 12, 13, and 17, 2008. On a June 18, 2008, conference call, Mr. Witter committed to NRC staff to taking specific corrective actions to be completed by specified dates. Mr. Witter informed NRC staff that he had begun a review into the inspection issues and had provided refresher training to radiographers and radiographer assistants who work in areas where the NRC maintains jurisdiction.

We also received a copy of a letter dated June 17, 2008, that was addressed to all of CAN USA, Inc.'s radiography team members, in which you discussed NRC regulations concerning radiography. In this letter, you discussed several radiation safety provision changes that you will implement that will benefit your radiation safety program.

Our inspection is ongoing and we will provide the results of our deliberations on this matter by separate correspondence, as our final enforcement decision has not been determined.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of your response and this letter will be made available electronically for public inspection in the, NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

CAN USA, Inc.

If you have any questions regarding this letter, please call Mr. Richard Leonardi at 817-860-8187.

Sincerely,
