		STN	50-567

In your letter dated October 1, 1980, to All Licensees of Operating Plants and Applicants for Operating Licenses and Holders of Construction Permits, TVA was requested to provide information concerning its program for environmental qualification testing of equipment. As stated in my letter to you dated November 6, 1980, TVA has not yet developed a detailed plan and schedule for testing of safety-related equipment for Browns Ferry Nuclear Plant. We expect to provide the requested information on the test program for Browns Ferry Nuclear Plant by February 1, 1981. This information will provide a sufficient basis for the NRC audit program. Information on the test program for equipment at other TVA nuclear plants will be provided as required in future submittals for environmental qualification on each plant.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
L. M. Mills
L. M. Mills, Manager
Nuclear Regulation and Safety
