Tennessee Valley Authority
Nuclear Liability Insurance
Off-Site Values

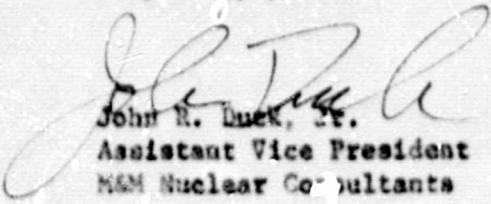

Dear Howard:

In response to your request, this is to submit information on the construction and warehouse values which are off-site as a result of the revised site descriptions under the ANI/M&MLU Nuclear Liability Insurance Facility Form Policies for the Tennessee Valley Authority nuclear plants listed below:

<u>Plant</u>	<u>Policies</u>	<u>Off-site Construction/ Warehouse Values</u>
Browns Ferry	NF-198/MP-66	\$21,000,000
Sequoyah	NF-247/MP-102	39,000,000
Watts Bar	NF-256	47,000,000
Bellefonte	NF-258	38,000,000

The following comments are offered regarding these values. At Browns Ferry, these are principally warehouse items. The Sequoyah values include significant construction values plus what will be a continuing high level of warehouse storage. Most of the Watts Bar values will ultimately go into the completed plant. At Bellefonte, these are almost entirely construction values. Very little permanent construction facility value is anticipated at Bellefonte.

Very truly yours,

John R. Luck, Jr.
Assistant Vice President
M&M Nuclear Consultants
