Chris
I understand "Open Items" is a safety term and will keep your suggestions in mind.
I will also make sure you see the hydro questions before they are presented to the applicant, even if this means you see them on Monday.
Thanx
Alicia

Alicia,
William's use of 'Open Item Information' is not correct. The term 'Open Items' have a special meaning in the safety world, and casual use of that term should be avoided. The correct term for this phase of the review is Information Need.

Please let PNNL know that I would like to review the list of Information Needs before we discuss them with the applicant. I would also like to incorporate my Information Needs into PNNL's list, and to have them incorporated into PNNL's tracking of item resolution during the audit.

Thank you,
Chris

Chris
Below are a string of emails I had with Bill regarding hydro.
I understand this doesn't solve the issue at hand, but I think this is something that should be brought up to PNNL. Sorry about any confusion.
If you have anything else, please let me know.
Thanx
Alicia

Alicia:

In response to your question on hydrology needs for the NA site audit. This was the earlier message regarding hydrology needs for the North Anna Site Audit. We will need to get open item information from Lance once we arrive next week.

Alicia:

See message I received from Lance regarding safety audit the week prior to the environmental audit. Phil Meyer will not stay and be available for the environmental audit. I think he means Fredricksburg, VA not Fredrichs, MD.

Bill,

The NRC hydrology safety folks have decided to have an audit the end of the week immediately before the environmental audit. This 'site audit' will actually occur at Bechtel's office in Fredrichs MD. There are only two topics for this audit: storm water drainage and groundwater. So Phil will have more than enough time to discuss all things groundwater. The environmental groundwater impacts are minor at North Anna. Therefore, I'm going to send Phil back to Portland and I'll stay around for the environmental audit the following week.
