All,  
Richard Jervey in DORL was able to answer the condenser tube composition question. The tubing is made of Grade 304 Stainless Steel.

Regards,  
Chris

Alicia I need to get back to Harry Ruth (not Larry) on the composition of the main condenser tubes. I thought Jack C. knew but he did not. Can you or someone else call Tony Banks at Dominion and ask him to find out. I do not have Tony's name and besides you are the PM. I am out all next week but will return on Tuesday the 27th. It will either be admiralty brass, stainless steel or titanium. Thanks, Mike
