Betsy,

WOW! I'm afraid that these fees (application and annual) are more than we can afford, so I'm withdrawing the application for a D&D license. Up to this point we've always done decon work under the client's license, but in this case (Vassar College) NY DOH felt that radium clean-up was outside the scope of what the college was competent to supervise, so they wanted a company with a D&D license. Thanks for volunteering to review this, and sorry for wasting your time.

Do you need a separate letter from me withdrawing the application?

Paul

Paul,

As you probably know by now, Shirley Crutchfield and I had another discussion about the requested authorized use (site remediation)/program code and the appropriate fee category(ies). The fee category 14 is for facilities doing their own decommissioning. Shirley Critchfield told me she sent you an email, listing 3N, 1D and 2C. The 3N covers the byproduct material, which is all you requested in your license. Shirley will also send you another email to correct that requested fee information.

When you respond to my RAI, just re-state that you do not want authorization for source (2C) or SNM (the 1D fee category). And you will not need to pay those fees, since you did not request those materials in the original, or in response to the RAI.

Betsy
